

ALUMINIUM TREATMENT

Treatment for a
brilliant result

Aluminium Treatment

At Barcelonesa, we have more than 20 years of experience in treating aluminium.

We know that top quality products, backed by excellent technical consultation, are the key to achieving the very best aluminium treatments.

In terms of Aluminium Anodising, we are specialists in products for Chemical Brightening and Electropolishing, and can offer you a range of specialised products and commodities. If you use Chemical Conversion or Passivation processes to treat Aluminium, as official Spanish distributors of AD International products, we can also offer you high-quality technical products.

Our service makes the difference. We offer delivery adapted to suit your needs, speedy response to your queries, and our technical team which will be available throughout to advise you and help you find the solution that best addresses your needs.

If you can't find what you're looking for, ask us!

Aluminum anodizing:

PROCESS	Alkaline		Acid	Additives	
DEGREASING	BDClean		BDAIunet		
SATIN	Caustic soda			BD Satinesc	
BRIGHTENING	Chemical		Electropolishing		
	BD Brial HD	Decap NP-1	BD Electroal PS1	BD Adibright	BD Activbright
	BD Brial HD Eco	Decap NP-1 ECO	BD Electroal PS2	BD ECObright	BD Econox
	BD Semipolish				
DESMUTTING	Without Flouride		With Flouride		
	BD Desumtox	BD Preventox	BD Desmutox P		
ANODISING	98% Sulphuric Acid			Tartaric Acid	BD Anodesc
				Oxalic Acid	
COLOURING	Organic		Inorganic		
	<p style="text-align: center;">CLARIANT <i>We are Clariant Official Distributors*</i> Consult the color catalog.</p>			BD Tampón 5.5	BD Tampón 6.2
				BD Tampón 5.8	BD Protective Dye
SEALLING WITH NICKEL	Medium Temperature		Low Temperature		
	BD Nikalseal		BD Seal F	BD Tensodial	BD Tampón 5.8
			BD Senodial T6	BD Tampón 5.5	BD Tampón 6.2
NICKEL-FREE SEALLING	High Temperature				
	BD Eco-Senodial forte	BD Eco-Senodial estándard	BD Aditive Forte		

* We are official distributors of Omya / Clariant for the areas of Spain, Portugal and Maghreb.

Aluminum Passivation

As official Spanish distributors of AD International products, we can offer you high-quality technical products, especially those used during chemical conversion processes.

Alkaline	Acid
BDClean	BDAlunet

Desmutting

Without fluoride
BD Desumtox
BD Preventox

Chemical Conversion

Producto	Descripción
PRECOAT A32	The PreCoat A32 conversion coating uses a trivalent chromium base and offers excellent performance. To improve the results of alloys rich in Cu (Series 2000 and 7000), should be combined with this product and a final stage should be implemented with the A32 PostRinse

Preparation for paint / lacquer coating

Producto	Descripción
PRECOAT CR FREE	Conversion coating that is completely chromium-free that is used in the pre-treatment of aluminium alloys prior to the organic coating process with paint or lacquer.
PRECOAT COLOR	Conversion coating that is completely chromium-free that is used in the pre-treatment of aluminium alloys prior to the organic coating process with paint or lacquer. It is used to obtain a yellow-coloured conversion coating. Does not require a final rinse.

Water treatment products

At Barcelonesa we have specific products to achieve the best performance in water purification. For more information on how we can help you get the best water treatment, consult our specific website by clicking [here](#).

COAGULANTS

Coagulants allow to increase performance in treatment plants. They help the removal of phosphorous and other substances or metals from purifying waters.

Product	Description
BD SODAL	Alkaline product that in addition to helping the neutralization of acidic waters promotes the precipitation of particles, metals present in the waters.
BD DEPURAL 18	Acid product. Coagulant prepared to improve the flocculation of the particles, metals or substances present in the waters. Especially recommended for phosphorus reduction.
DEPURFER 100	Acid product. For all types of treatment plants

FLOCCULANTS

There are flocculants in solid or concentrated liquid format, choosing the most suitable for the waters to be treated is essential to achieve the best purification. We study your case and we recommend the one that best suits your needs.

Product	Description
BD POLIFLOC	Range of solid and liquid flocculants. Our formulations include high molecular weight anionic, cationic, blended, and nonionic polyacrylamides.

METAL CATCHER

To achieve the reduction of certain metals in the water, specific additives can be used that will help reduce the levels of these residues.

Product	Description
BD DTC	Metal removal in surface treatment waters. High performance in nickel or iron uptake.
